PROFILE

Automation engineer with **hands-on experience in international commissioning** of industrial plants and a national engineering diploma in Computer Engineering / Industrial Computing (ZAB-recognized). Configures, tests and commissions **Siemens S7-1200/S7-1500** with **TIA Portal, Profinet, HMI and ET200** through to production start-up. Complemented by experience in **offline robot programming** (RoboDK, 6-axis industrial robots) and **embedded systems** (ESP32, Raspberry Pi, C/C++, Python). **Target position:** Automation Engineer • Robot Programmer • Commissioning Engineer – **available immediately**.

TECHNICAL SKILLS

Control Systems	Siemens S7-1200 / S7-1500 • TIA Portal • PLC programming • HMI configuration • ET200 (distributed I/O)
Industrial Communication	Profinet • Profibus • Industrial Ethernet
Commissioning & Service	Hardware configuration • functional and signal tests (sensors/actuators) • systematic troubleshooting • technical documentation
Robotics & CAM	Robot programming • RoboDK (offline programming) • 6-axis industrial robots • path planning & collision checking • Mastercam
Software Development	Python • C / C++ • Java • SQL / MySQL • JavaScript • PHP • HTML / CSS • WinDev / WebDev
Embedded Systems & AI	ESP32 • Raspberry Pi • Arduino • C / C++ • Python • Computer Vision • Deep Learning (CNN)

PROFESSIONAL EXPERIENCE

PLC & Automation Engineer

04/2026 – Present

Gemin Installation • Project assignments in Tunisia / Algeria

- Commissioning and **production start-up of SIDEL industrial plants** on international project assignments (Tunisia, Algeria).
- **Configuration, functional testing and commissioning** of Siemens **S7-1200/S7-1500** controllers and **Profinet** networks in **TIA Portal**.
- Setup of **HMI** and **ET200** components as well as **signal and functional checks** of sensors and actuators during plant operation.
- **Systematic fault diagnosis** on PLC, HMI and industrial communication, contributing to a stable production start-up.
- **Technical documentation** of test results, fault patterns and corrective actions for a smooth handover to project and service teams.

Software Developer

08/2025 – 03/2026

Best Info • Megrine, Tunisia

- **Design and development** of custom web, mobile and desktop applications with WinDev, WinDev Mobile and WebDev.
- **Requirements analysis** and implementation of structured software solutions including **database integration**.
- **Testing, fault analysis and performance optimization** to improve usability and system performance.

DEGREE RECOGNITION

Degree recognized in Germany: According to the certificate evaluation by the Central Office for Foreign Education (ZAB), the engineering diploma is **comparable to a German university degree**. Document available on request.

EDUCATION

National Engineering Diploma in Computer Engineering / Industrial Computing National School of Electronics and Telecommunications of Sfax (ENET'Com), Tunisia	2023 – 2025
Professional Master's in Development Engineering, Computer Robotics & Artificial Intelligence Higher Institute of Technological Studies of Radès (ISET Radès), Tunisia	2022 – 2023
National Diploma in Electrical Engineering – Automation & Industrial Computing Higher Institute of Technological Studies of Radès (ISET Radès), Tunisia	2019 – 2022
Baccalaureate (Technical Track) Bousalem High School, Tunisia	2018 – 2019

PROJECTS & INTERNSHIPS

Engineering Thesis: Offline Programming of an Industrial Robot SIAF · Sfax, Tunisia	02/2025 – 06/2025
- Development of an offline programming workflow in RoboDK for a 6-axis industrial robot (CRP RH). - Generation and optimization of complex machining paths in Mastercam; integration of the G-code into RoboDK. - Implementation of automatic collision detection and correction for safe trajectory validation.	
Internship: ESP32-Based Conveyor Belt Monitoring System IRD Solution · Korba, Tunisia	07/2024 – 08/2024
- Programming of an ESP32 (C/Python) for real-time acquisition, recording and analysis of conveyed goods. - Development of an interactive real-time dashboard with HTML, CSS, JavaScript, PHP and MySQL.	
Internship: AI-Based Access Control System Center Delice · Bousalem, Tunisia	07/2023 – 08/2023
- Development of an access control system with face recognition on Raspberry Pi (Python, CNN-based deep learning). - Implementation of real-time identification, video streaming, notifications and cloud data storage (Firebase).	
Project: PLC Automation of a Production Process (TIA Portal) CSM Gias · Bouargoub, Nabeul, Tunisia	02/2022 – 06/2022
Automation of spread production: replacement of manual operations with automatic valve control. Programming in TIA Portal (order management logic) and design of an HMI for process visualization and control.	
Internship: Industrial Inventory Management Application Electronics company · Sidi Rezig, Tunisia	08/2021 – 09/2021
Development of a real-time application for tracking raw material inventory and improving material flow transparency (web technologies, SQL, Firebase).
